

Actuator for dampers

 Elektrinis sklendės variklis yra skirtas sklendės valdymui vėdinimo ir oro kondicionavimo sistemose.

 The function of the electrical motor is to control the shut-off damper in ventilation and air conditioning systems.

 Der elektrische Klappenmotor ist für die Steuerung der Schließklappe in Lüftungs- und Klimaanlage bestimmt.

 Двигатель электрической заслонки предназначен для управления заслонками в системах вентиляции и кондиционирования.

For dampers up to approx. 1m²; for torque up to 5Nm

Type	Power supply, V	Control signals
227-024-05	actuator 24 VAC/VDC	2 and 3-point
227S-230-05	actuator 230 VAC	2-point (ON/OFF)
227C-024-05	actuator 24 VAC	modulating 0...10 VDC

For dampers up to approx. 3m²; for torque up to 15Nm; spring return

Type	Power supply, V	Control signals
232-024-15	actuator 24 VAC/VDC	2 and 3-point
232D3-230-15	actuator 230 VAC	2 and 3-point
232C-024-15	actuator 24 VAC	modulating 0...10 VDC
